

Benedict Springbett – Junior Steward

GOALS FOR THE YEAR

My main goals for the year are food-related. I want to ensure that the servery better caters for dietary requirements and vegans. I also want to push College to greatly improve the Bar, and act upon feedback from the TCSU food survey. In the realm of societies, I will continue to ensure that the Amalgamated Clubs Committee works efficiently, and that running a society is easy as possible. I would also like to encourage more societies to be set up, demystifying the often bureaucratic process.

LENT 2019

Goals	Progress
Push catering to implement labelling of allergens on menus in the Servery.	Catering are currently implementing a detailed allergen labelling system, which will hopefully be rolled out in Easter Term.
Following feedback from the TCSU food survey, push for a 'superhall' to be introduced: a termly, nicer formal for undergraduates like the BA Feasts	Catering are planning to introduce an undergraduate feast at the start of Easter Term, or in Michaelmas, costing about twice the price of a normal formal ticket
Find a more workable solution to the provision of vegan food in the servery than the Daily Special	The Daily Special will stay as a 'Tesco Value meal'; however, Catering now have plans to revamp the salad bar, allowing vegans to build their own meal. The new allergen labelling system will also state when the vegetarian option is vegan.
Ensure that the servery doesn't always serve stodgy, meat-and-potato food	The servery has to cater for a variety of tastes; the new, better salad bar should allow those who want lighter food, or smaller portions, to have a better meal.
Pushing for menus for Formal Hall to be placed more prominently, rather than tucked away on UPay	There is limited space on the noticeboards outside the Great Hall; however, there will be a

	new TV screen put up and Formal menus should be on there from next term.
Encourage College to improve the bar	It is quite easy to change the selection of drinks in the bar; food, however, is harder since the bar has currently maxed out on power, so it can't prepare any new food. As a very long-term (several years) goal, I would like to push for a refurbishment in the bar, to use the large amount of wasted space and reduce overcrowding.
Ensure that the Amalgamated Clubs Committee runs smoothly and societies have money distributed to them efficiently	Lent has not been a busy time for the ACC, however I have ensured that the process of claiming ACC grants made in this term has been as smooth as possible.
Improve the room booking system, which has a particular impact on College societies	TCSU as a whole are currently working on this, as a continuation of the previous committee's work.
Write an improved guide to setting up a society at Trinity	This is a longer-term project, for the Summer vacation; it will then be revised in Michaelmas following consultations with College societies.
Encourage societies to run as many events as possible in Freshers' Week	I have contacted all societies about events in Freshers'. Due to limited slots, we will need to use a ballot system to allocate mingles and receptions. All societies will still have the opportunity to host their own private events, and all will have the option of a stand at Chaplains' Squash and a page in the Societies' Handbook.
Make sure that Chaplains' Squash is well-organised and helps societies to recruit members	Chaplains' Squash will be organised in Easter Term. However, I will ensure that a floorplan of the Squash is placed in the Freshers' Handbook.
