

# THINKING 'BOUT THE ENVIRONMENT?

*Here's a Green Choice*

**Vote Toby Collins**

**Prop: W. Deacon**

**Second: J. Alwall**

## Who Even is this Guy?

Hi, I'm Toby, a second year Nat-Sci reading chemistry. I enjoy rowing, hiking, theatre, and (God forbid) my subject. While I don't take QES, I still care: about your future, about my future, about our blue marble.

## What Does He Want?

**What a Waste!** - Reduce the college's abundance of single-use plastic waste, starting with reusable cups in hall

**Feeling the Heat** - Compel college to decrease wasteful power consumption by reducing inefficient (and perpetually active) heating and lighting

**Reduce, Reuse...** - Continue the Sisyphean battle to ensure recyclable rubbish is actually recycled

**Story Time** - Increase awareness and engagement by running themed events, including a Green Formal and Quiz, and hosting environmental speakers and panel discussions

**Food, Glorious Food** - Work with the Junior Steward to *improve* and promote vegan and vegetarian options in hall

## Does He Have What it Takes?

I am currently the Social Secretary for the boat club, so I know how to run engaging events. I was a prefect at my school and a member of the Green Committee, helping to earn the Green Flag Award.
